

2011-12 Testing Report

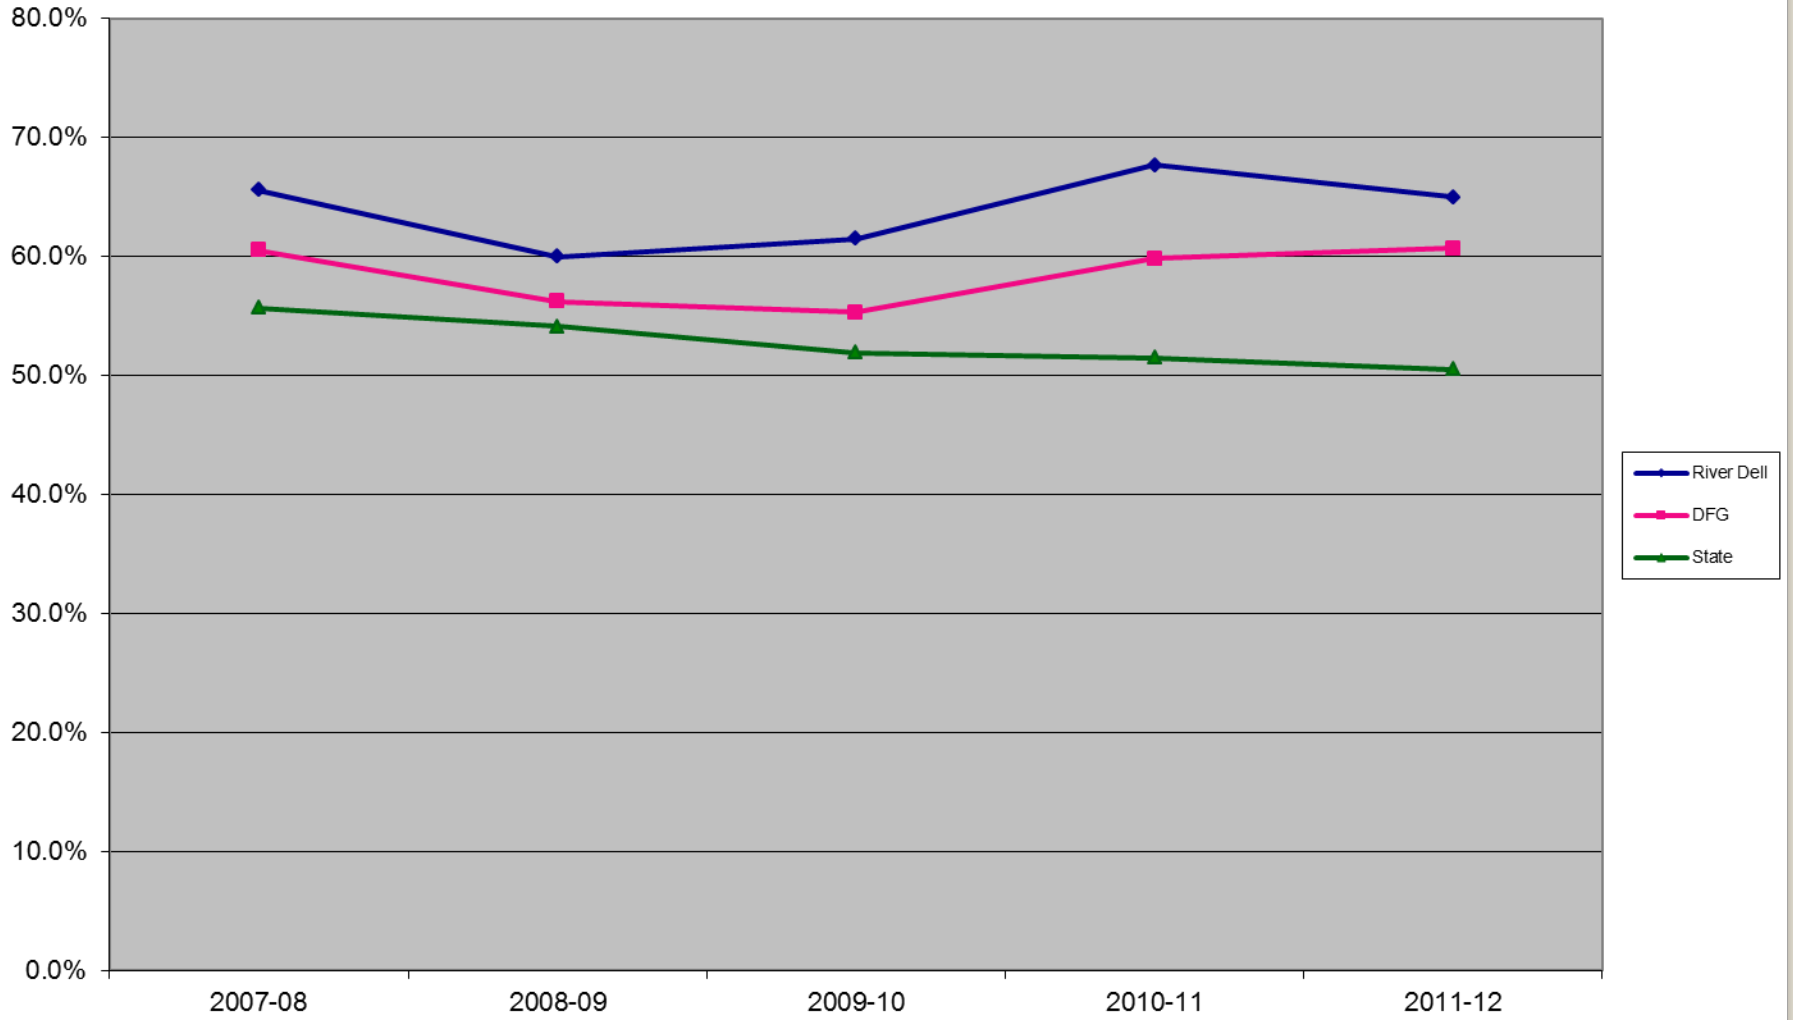

Patrick J. Fletcher
Superintendent of Schools
September 24, 2012

- Assumptions:
- All data is reported for all students. It has not been disaggregated.
- All scores are reported for the appropriate grade. As an example, the HSPA scores contained only those students who were in the eleventh grade at the time of testing.
- All state testing data is available on the NJ Department of Education's (NJDOE) website.
- All SAT data is from the College Board except for the DFG figures. The DFG figures are compiled by the NJDOE.
- All Advanced Placement data is from the College Board. We are still working to find an appropriate reporting mechanism that presents State and DFG comparisons.

AP Students Scoring 3 or Better

- Conclusions:
- River Dell consistently performs well above state averages in all areas of all tests.
- River Dell continues to compare favorably with DFG schools in the Partially Proficient category.
- River Dell continues to compare favorably with DFG schools in the Proficient category.
- River Dell has a mixed comparison to DFG schools in the Advanced Proficient category. River Dell outperforms the DFG in NJASK Math 7 and 8. Additionally, River Dell is moving more students to the Advanced Proficient category overall.
- River Dell continues to compare favorably with DFG schools on the SAT exam. DFG data for 2011-12 is not available until the publication of the Annual School Report Card.
- Eighty percent of River Dell students score three or better on the Advanced Placement exams on a consistent basis.
